# INTRODUCING A GALAXY OF VEHICLES

## WITH RESISTANCE HERO POE DAMERON

What's the best ship in the galaxy? It's my own T-70 X-wing starfighter, *Black One*, of course! I don't plan to part with my X-wing any time soon. So, what is the best galactic ride for you? Find out over the pages that follow.

I'll guide you through some great vehicles, from a small speeder bike to the biggest battle station. If you can't find something to meet your needs here, then you might just have to build your own!

Travel safe and may the Force be with you.

## CHAPTER ONE

# GOING SOLO

When it's just you and your droid, these compact craft are the vehicles you're looking for! From starfighters to ski speeders, the vehicles in this section have just one seat. They still pack in plenty of other features for your solo adventures.

# A-WING STARFIGHTERS

If you're looking for a grade-A vehicle, you can't do much better than an A-wing starfighter. Much loved by rebels and Resistance pilots alike, its simple wedge-shaped design forgoes any fancy details in favor of being fast, fast, fast!

*This ship is awesome with a capital "A!"*

## MISSION LOG

### BATTLE OF ENDOR

Classic RZ-1 A-wings played an important role in the destruction of the second Death Star above the Forest Moon of Endor.

### DEFENSE OF D'QAR

When the First Order attacked the planet D'Qar, RZ-2 A-wings went into battle. This gave other Resistance ships time to escape.

## ALTERNATIVE VIEW

## OPTIONAL EXTRAS

Most A-wings have powerful defensive shields. You can strip these out to go even faster—if you dare!

Laser cannons need regular maintenance

## WHAT TO WEAR

Many A-wing pilots wear distinctive cheek-hugging helmets that do not require a chinstrap. It's a classic look, and handy for any aliens who don't have chins.

## NEED TO KNOW

**Model:** RZ-2 A-wing Interceptor

**Length:** 7.7 m (25 ft)

**Top speed:** 1,350 kph (838 mph)

**Weapons:** Laser cannons, missile launchers

**Made by:** Kuat Systems Engineering

**[OVERDUE!]**

Dear Pilot,  
Your RZ-2 A-wing Interceptor has been recorded traveling at 1,350 kph in a 1,300 kph zone. You must pay 1,000 New Republic Credits within 10 days of this notice or your vehicle will be seized and may be sold for scrap.

# B-WING STARFIGHTERS

B-wing starfighters have powerful weapons and special rotating cockpits. But their lack of speed made them unpopular with pilots, and most were stripped down for parts. For that reason, this ship is something of a collector's item in the New Republic era.

## ALTERNATIVE VIEW

## NEED TO KNOW

**Model:** A/SF-01 B-wing starfighter

**Length:** 16.9m (55ft)

**Top speed:** 950kph (590mph)

**Weapons:** Laser cannons, ion cannon, proton torpedo launchers

**Made by:** Slayn & Korpil

## AS USED BY ...

### Hera Syndulla

This rebel pilot flew the first ever B-wing. It was a bright-orange prototype called the B6.

# PROS AND CONS

### Ten Numb

This brave member of Blue Squadron defeated two Star Destroyers in his B-wing.

*To "B" or not to "B?" Now there's a question!*

# X-WING STARFIGHTERS

The iconic X-wing might just be the most famous starfighter in the galaxy, but is it the right ship for you? Well, if you're looking for speed, style, and a place to store your astromech, the answer is probably yes. If you want to be like Luke Skywalker, the answer is also yes!

## MISSION LOG

### BATTLE OF YAVIN

Luke Skywalker used the Force and a T-65 X-wing fighter to single-handedly blow up the first Death Star.

### DOWNED ON DAGOBAH

Luke took his X-wing to Dagobah in search of Jedi Master Yoda, where it survived sinking in a swamp.

### BATTLE OF TAKODANA

Resistance X-wings came to the rescue when the First Order attacked the planet Takodana in search of a map that led to Luke Skywalker.

**Made by:** Incom Corporation

## AS USED BY ...

### Luke Skywalker

From the Battle of Yavin to his secluded life on the planet Ahch-To, Luke was never far from a T-65 X-wing!

### Biggs Darklighter

Luke's boyhood friend also grew up to be an X-wing pilot in the Rebellion's Red Squadron.

### Poe Dameron

Who's this dashing guy? Why, it's only the ace pilot of the T-70 X-wing known as *Black One*!

# Y-WING STARFIGHTERS

If you love tinkering with machinery, a Y-wing is just the thing. Most early models have had their hull plating stripped away for easy access to their workings. The latest versions are actually built that way. This makes it easy to repair these sturdy starfighters.

# IMPERIAL TIE FIGHTERS

Say what you like about the Empire, but they knew how to make a starfighter. Named for their loud Twin Ion Engines, TIE fighters are designed not only to fight, but also to spread fear simply by roaring overhead. Do not get one of these if you want to make friends!

## GOING GREEN?

*TIE fighters are surprisingly environmentally friendly. Their large solar panels use starlight to power the engines and laser cannons.*

## OPTIONAL EXTRAS

Available upgrades for the TIE line include faster-than-light drives and mean-looking red windows, as seen here in Kylo Ren's TIE silencer.

## WHAT TO WEAR

TIE fighters are *not* built for comfort. In fact, they don't even have any atmosphere! You'll need special breathing gear to fly one in space.

# SOULLESS ONE

You don't need four arms to fly this starfighter, but it helps! Modified for the six-limbed cyborg General Grievous, its small cockpit is surrounded by heavily armored engines. Because Grievous sometimes used this ship for flying away from battle, it was also known as the *Spineless One*.

Lightsabers left at owner's risk!

## AS USED BY ...

### General Grievous

Grievous was more machine than man and he could move incredibly fast. But he still couldn't fly without a ship!

### Obi-Wan Kenobi

# JEDI INTERCEPTORS

In the days before the Jedi Order disappeared, they had their own fleet of ships. This included the swift and stylish Eta-2 light interceptor, commonly known as the Jedi interceptor. They became rare after the Empire fell, making this vehicle a collector's dream find.

**Length:** 5.5 m (18 ft)

**Top speed:** 1,500 kph (932 mph)

**Weapons:** Laser cannons,

**Made by:** Kuat Systems Engineering

## MISSION LOG

## BATTLE OF CORUSCANT

Anakin Skywalker had to crash-land his yellow interceptor on the enemy flagship in this battle—before crash-landing that, too!

## MISSION TO MUSTAFAR

When Anakin turned to the dark side, he flew a new, green interceptor to the planet Mustafar on a secret mission for Darth Sidious.

# PODRACERS

If you have the need for speed, then a podracer might be the ride for you. They may not look it, but podracers are surprisingly strong and extremely fast! Most famously used on the planet Tatooine, these custom-built craft are made with just one thing in mind—speed!

*Sign me up  
for the pod  
squad!*

## WHAT TO WEAR

Podracer cockpits are usually open to the air. You'll need a good pair of goggles to keep the dust (and flying debris from exploding podracers) out of your eyes.

## NEED TO KNOW

**Model:** Anakin Skywalker's Podracer

**Length (engine):** 7 m (23 ft)

# SKI SPEEDERS

These ships were designed for asteroid slalom races, with a single ski keeping them in contact with the ground at all times. They're just the thing if you want to try the extreme sport. Ski speeders can also be used for exploration and defense, as rebels and Resistance fighters found on the planet Crait.

# SPEEDER BIKES

There are many different designs of speeder bike, but all put speed ahead of safety. Popular models include the BARC speeders used during the Clone Wars; the 712-AvA used by bounty hunter “the Mandalorian;” and the 74-Z favored by the Empire’s biker scouts. Whichever kind you choose, be sure to wear a helmet!

### Leia Organa

Leia “borrowed” an Imperial 74-Z speeder bike to race through the trees on the Forest Moon of Endor.

*You never forget how to ride a speeder bike!*

# PROS AND CONS

## ON A SPEEDER BIKE

- 👍 Small enough to stash in the back of a compact family starship.
- 👍 At home anywhere, from the forests of Endor to the icy planet Hoth.
- 👎 Provides little protection against the elements. Bring your goggles!
- 👎 Open design makes the vehicle an easy target for attackers.

### Rey

Before she became a Jedi, Rey was a scavenger who built her own speeder bike out of salvaged parts.

### OWNER'S TIPS

1. Use a tractor beam to secure yourself to the seat.
2. Always keep one foot on the speed-control pedals.
3. Watch out! Speeder bike thieves are always around.

# SOLO WALKERS

Why fly when you can walk? With long metal legs at your disposal, you can stomp around the galaxy without ever breaking a sweat. Large walkers are famously slow, but these solo vehicles are much more fleet of foot. Some can even leap their way over long distances.

**TRY BEFORE

# RESISTANCE BOMBERS

The long, lower part of this unusual-looking ship is meant to be packed full of proton bombs. But peace-loving pilots may find it also comes in handy when they have a lot of shopping. There's plenty of room for friends as well, so no one needs to be dropped!

## OPTIONAL EXTRAS

The bomb bays in StarFortress bombers can be converted to hold liquids. They can be used as fuel tankers or even flying fire engines.

## PERFECT FOR ...

Making large deliveries to enemy bases, whether they want them or not!

## AS USED BY ...

### Finch Dallow

Fearless Finch faced the First Order as pilot of the Resistance bomber *Cobalt Hammer* during the Battle of D'Qar.

### Paige Tico

While Finch flew the *Cobalt Hammer*, Paige prepped the proton bombs and pressed the buttons to launch them.

# IMPERIAL SHUTTLES

Imperial ships aren't famed for their looks, but the design favored by the Emperor is in a class of its own. *Lambda*-class shuttles are sleek and stylish with their elegant folding wings. This is the shuttle you want to arrive in when you go to a glitzy party.

## VEHICLE REVIEWS

# ATTACK SHUTTLES

Omicron-class attack shuttles were used by the Galactic Republic during the Clone Wars, and by “Bad Batch” Clone Force 99 in the Imperial era. These mean, muscular ships don’t look as grand as Imperial shuttles, but they certainly live up to their name.

## MISSION LOG

### CAUGHT ON KAMINO

After disobeying a direct order from the Empire, Clone Force 99 flew their Omicron-class shuttle back to Kamino to face the consequences.

## PROS AND CONS

### IN AN OMICRON-CLASS ATTACK SHUTTLE

- 👍 All the benefits of a starfighter and a shuttle in one ship.
- 👍 Cool to fly the same kind of ship as the elite Clone Force 99.
- 👎 No element of surprise when you attack in an attack shuttle!
- 👎 Dangerous to risk being mistaken for Clone Force 99!

## AS USED BY ...

# BOBA FETT'S STARSHIP

Before this ship was Boba Fett's, it belonged to Boba's father, Jango, who was also a bounty hunter. If you want to fly it, you'll need to get to grips with all the hidden upgrades the Fetts have made over the years . . . and be sure to get Boba's permission first!

## VEHICLE REVIEWS

### TheWanNOnlyKenobi

I didn't think flying could get any worse until I tried to outfly this starship!

## MISSION LOG

### ESCAPING FROM OBI-WAN

Young Boba and his father, Jango, used their family ship to flee from Obi-Wan Kenobi on the water world of Kamino.

### HUNTING FOR HAN

When Darth Vader used bounty hunters to find Han Solo, Boba Fett's starship won the race to track him down.

### GOING AFTER GROGU

Boba Fett and his starship helped the Mandalorian get to Grogu when he was kidnapped.

# RAZOR CREST

This classic ship was built before the Empire was founded. The *Razor Crest* eventually became the modified motor home of the bounty hunter Din Djarin, known as the Mandalorian, and the Child, Grogu. It may not be much to look at, but the *Razor Crest* is both roomy and functional.

## NEED TO KNOW

# AT-ATs

All Terrain Armored Transports are a feat of engineering. One AT-AT can march more than 40 Imperial troopers into battle, with room for speeder bikes in the back. They also offer great views of wherever you're going, and leave heavy footprints to show where you've been.

## PROS AND CONS

# SANDCRAWLERS

In a dusty desert, reliability beats speed every time! Slow and steady sandcrawlers are custom-built for desert driving, and their engines won't get clogged with sand like fast-flying skiffs and speeders. They're also big enough to carry plenty of spare parts and even your own Jawa repair crew.

## VEHICLE REVIEWS

### OrsonKrennicOK

I would not have spent so much on my Death Star if I had known they were going to bring out a Death Star II just four years later!

### Mon\_Mothma

I've not actually been to the Death Star II, but I've heard bad things about it from many Bothans.
